

Technology Stack

Date	19 July 2026
Team ID	xxxxxx
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS	Responsive and user-friendly interface

2	Backend / Server-Side	Python Flask	Lightweight framework for ML model deployment
3	Database / Data Storage	SQLite	Simple, lightweight local database
4	Cloud / Hosting / Deployment	IBM Cloud / Render	Scalable cloud deployment
5	Version Control & CI/CD	Git, GitHub	Version control and collaboration

6	Third-Party APIs / Other Tools	<i>Kaggle Dataset, NumPy, Pandas, Scikit- learn, Matplotlib, Seaborn, Anaconda Navigator, PyCharm</i>	Data processing, model training, visualization, and development
